

# OPC UA

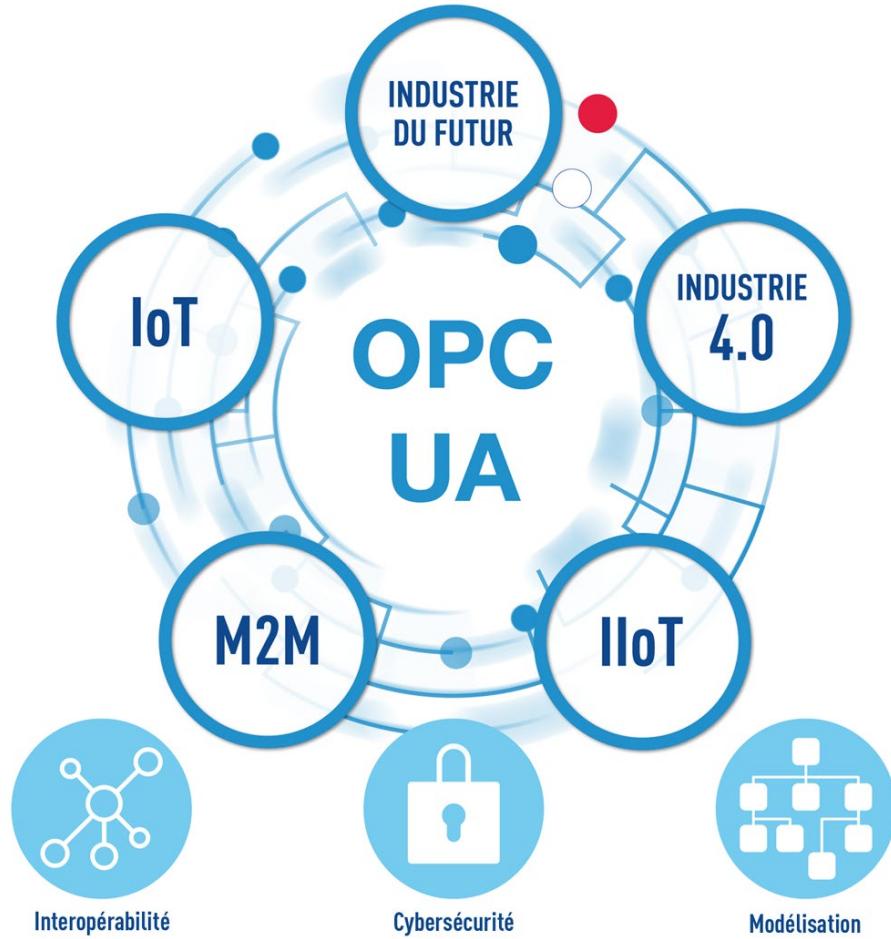

## La norme d'interopérabilité sécurisée pour l'Industrie 4.0 et l'IoT

OPC Day France, Saclay  
14 Juin 2023

# Principaux avantages pour les utilisateurs

- ▶ Gain de temps lors de l'intégration de la machine dans les installations
- ▶ Communication standardisée multi-vendeurs
- ▶ Accès hautes performances à de grandes quantités de données
- ▶ Sécurité intégrée grâce à des mécanismes à la pointe de la technologie
- Authentification par certificats, mots de passe ou délégation d'identité (OAUTH2)

# Les trois piliers de l'OPC-UA (IEC62541)

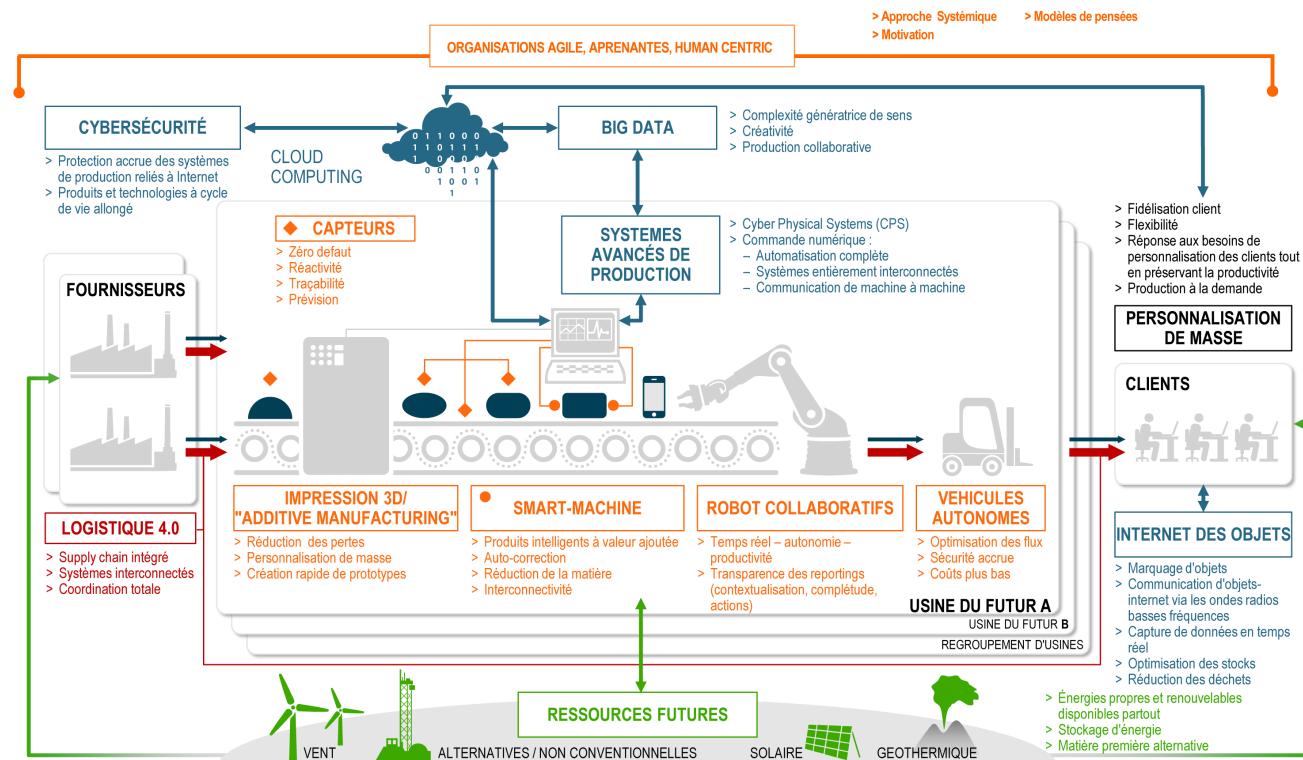

1. Interopérabilité
2. Cybersécurité
3. Structure de données
  - 3.1 : Modélisation métier (Companion Spécifications)  
Sémantique  
Structuration des données

# 1 - Interopérabilité

## L'interopérabilité, c'est :

La capacité des systèmes cyber-physiques (c'est-à-dire les porte-pièces, les stations d'assemblage et les produits), des humains et des usines intelligentes à se connecter et à communiquer entre eux via l'Internet des objets et l'Internet des services.

### ► Indépendant de la plateforme matérielle et logicielle

### ► Interopérabilité horizontale et verticale

- Convergence OT/IT du capteur jusqu'au cloud
- Intégré par tous les constructeurs

Source : Roland Berger

## 2 - Sécurité

OPC UA a été conçu autour de la sécurité

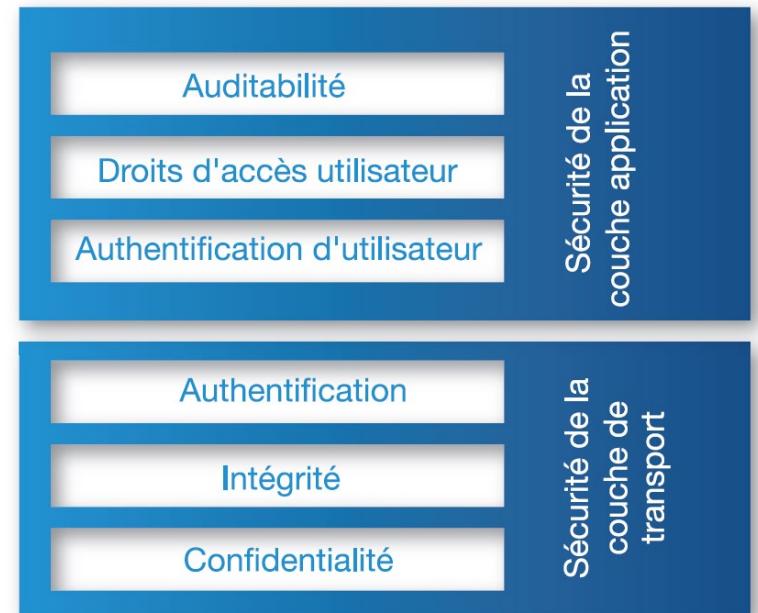

Basé sur des standards de sécurité ouverts

Authentification, chiffrement, ...

Evolutif: évolue avec les technologies de sécurité

Aligné sur les exigences de l'IT

Publication par l'office fédéral de la sécurité de l'information Allemand (BSI) des résultats de l'analyse de sécurité d'OPC-UA

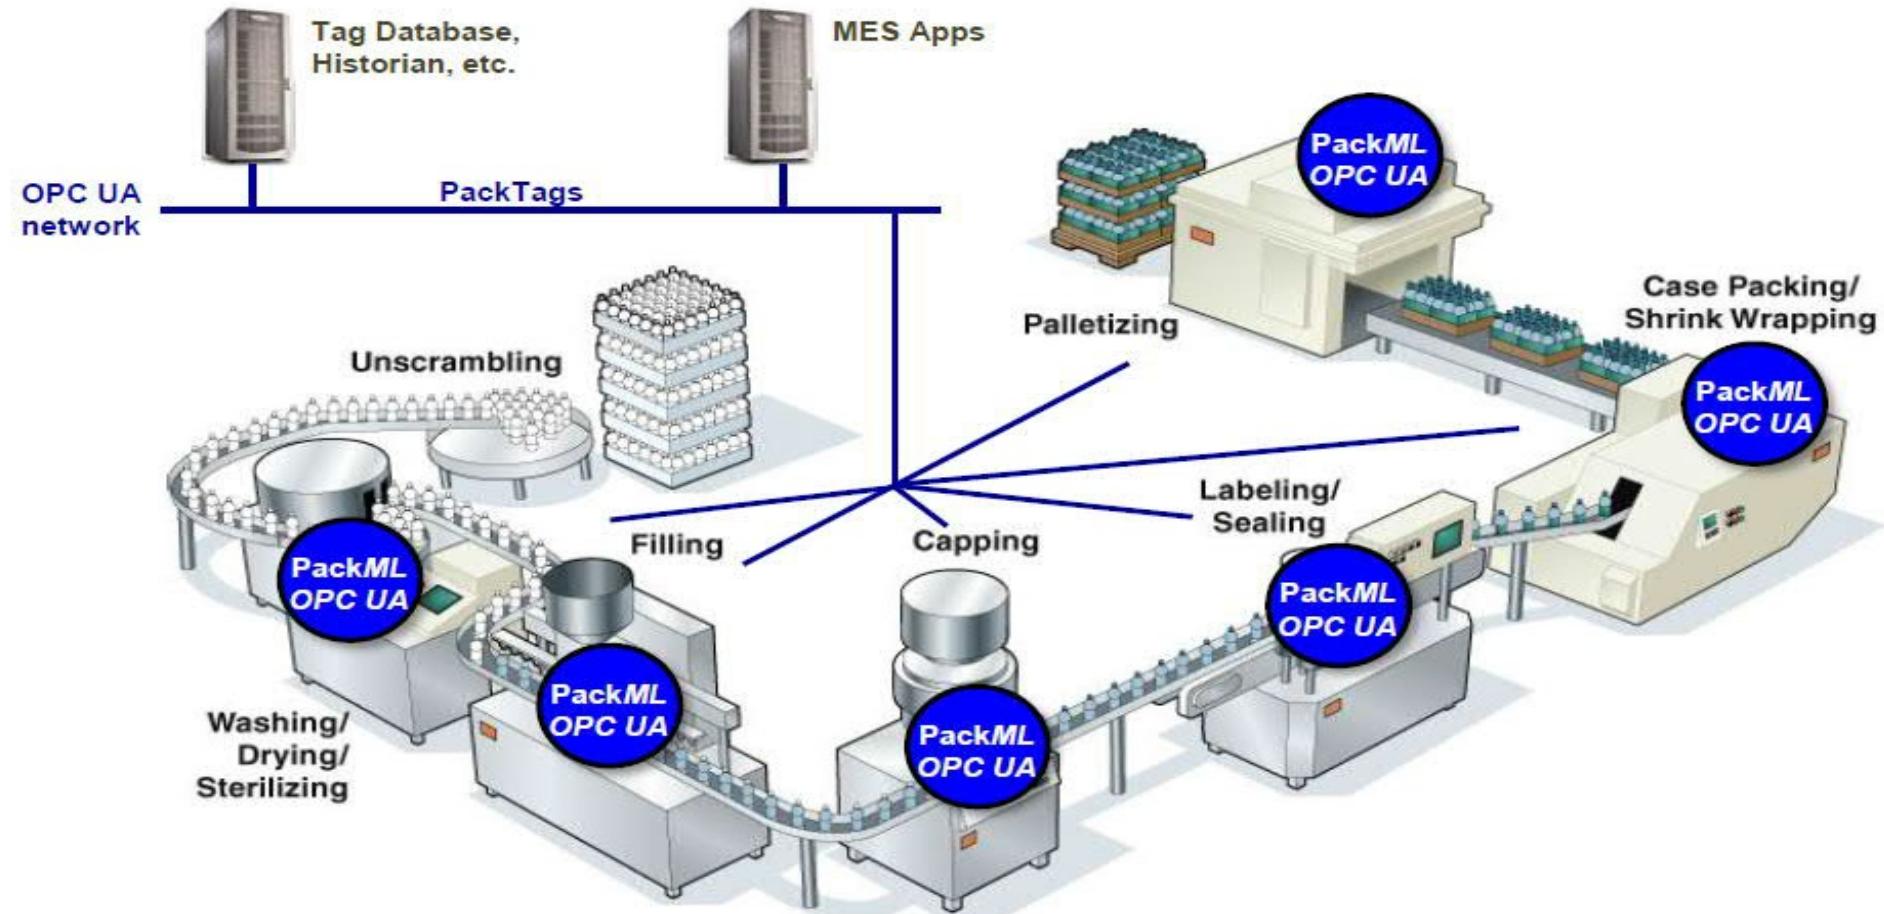

### 3 - Modélisation

La Fondation OPC coopère étroitement avec des organisations et des associations de différentes branches. Les modèles d'informations spécifiques à d'autres organisations de normalisation sont mappés sur OPC-UA et deviennent ainsi portables.

# Exemple d'intégration – Companion Spécs PackML

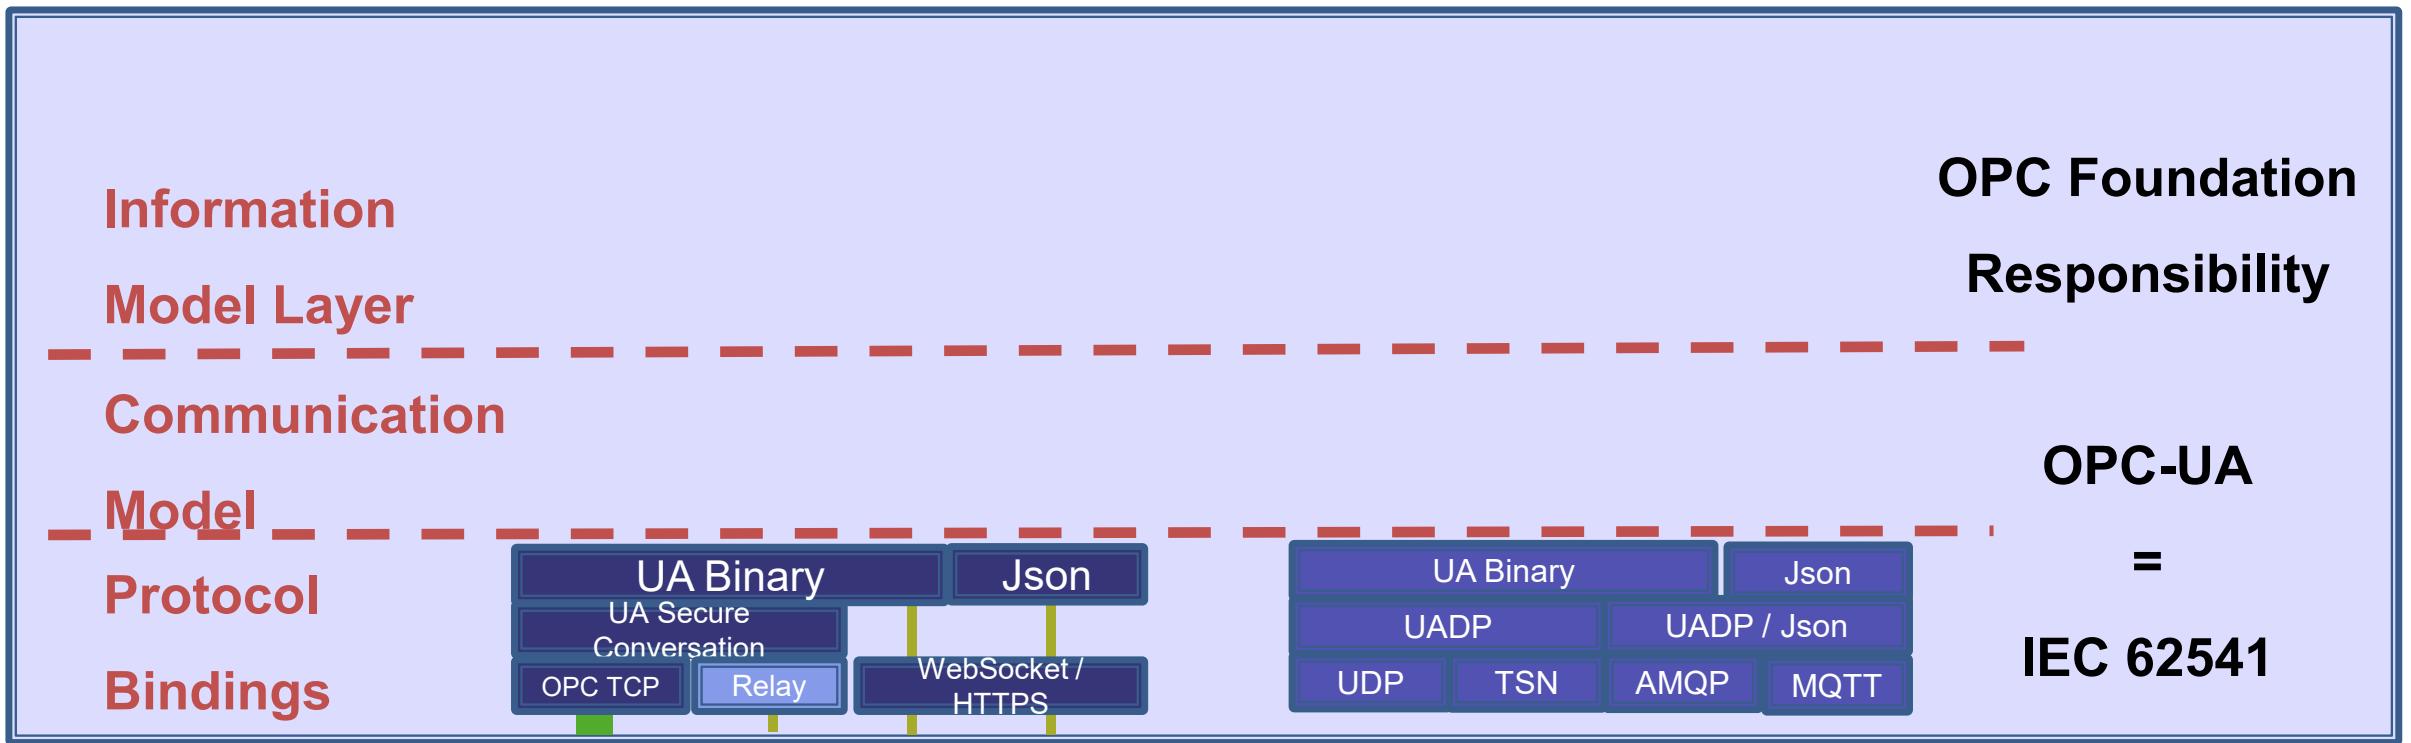

# OPC-UA : du capteur au Cloud

- 
- 1 IT / OT Communication
  - 2 Cloud Integration
  - 3 Secure Remote Access
  - 4 Local OT Communication
  - 5 Controller to Controller
  - 6 Controller to Field Device
  - 7 Wireless Integration (5G)
  - 8 Future Ready

# Protocol Bindings

Couche Basse avec plusieurs protocoles définis garantissant une intéropérabilité matérielle

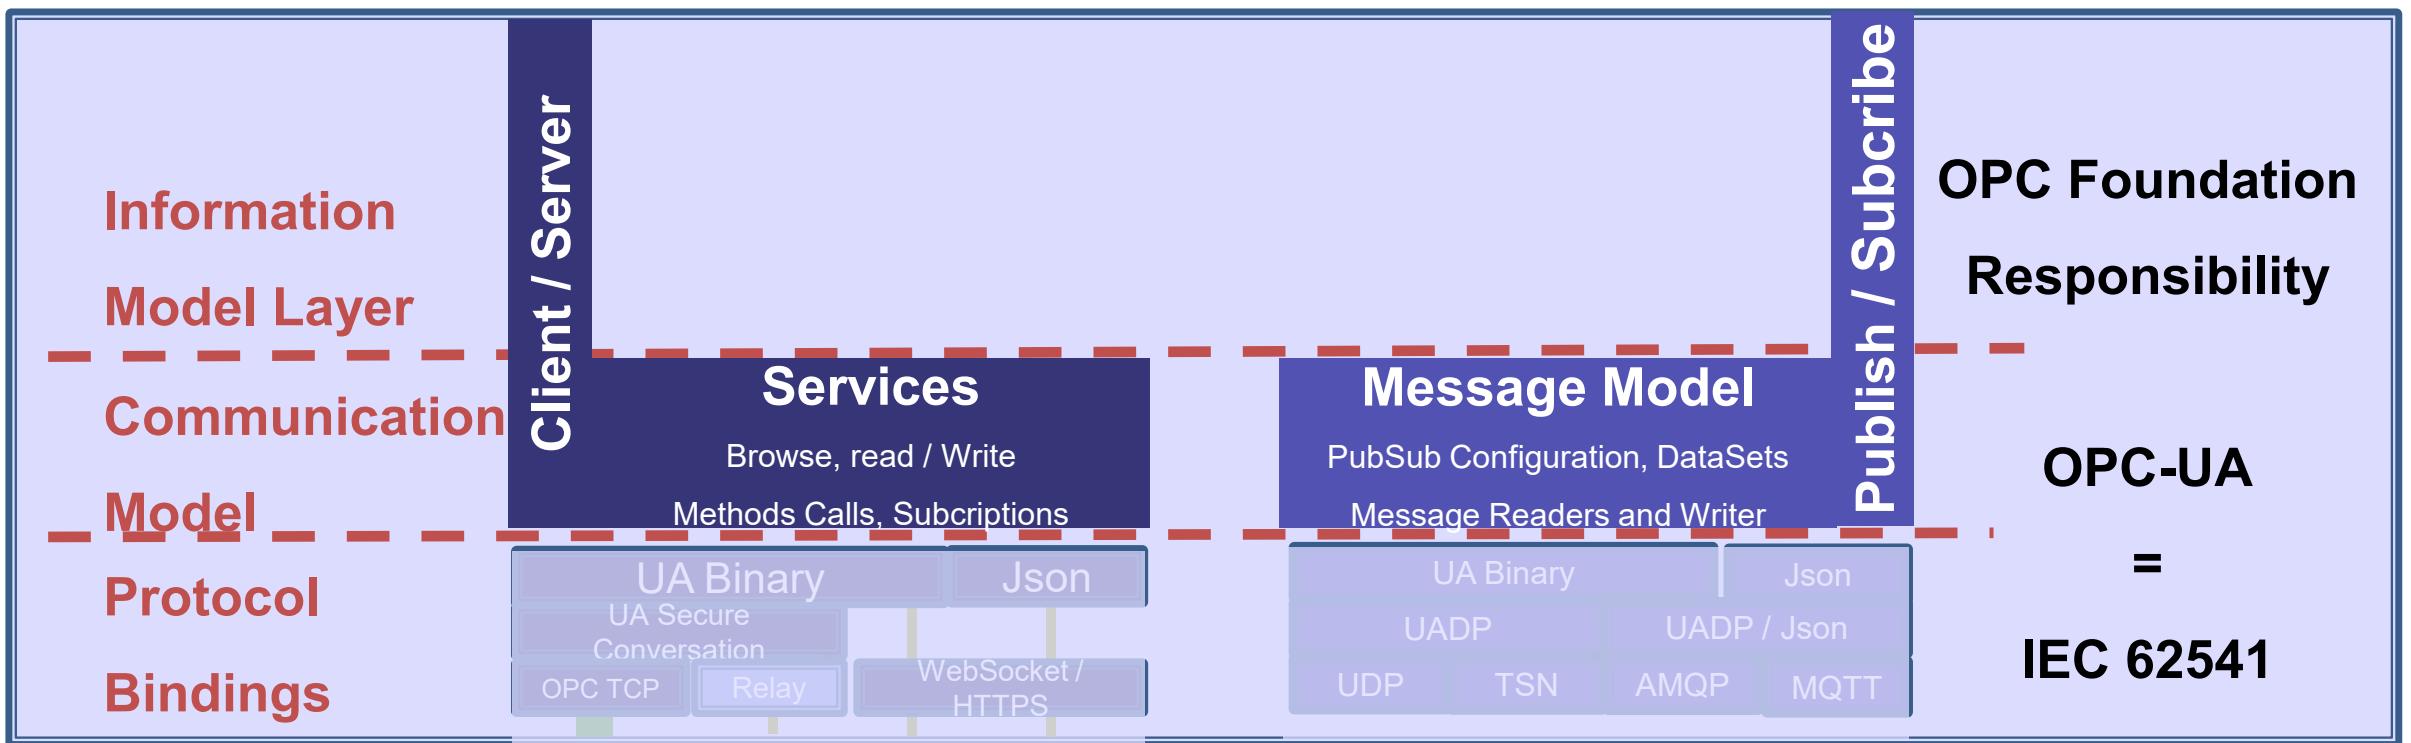

- UA-TCP - TCP/IP based, UA Binary
- UADP – UDP based, UA Binary, TSN deterministic
- UADP – MQTT based, JSON, Cloud, optional Broker

# Communication Model

OPC UA intègre les deux types de communications pour offrir le maximum de flexibilité

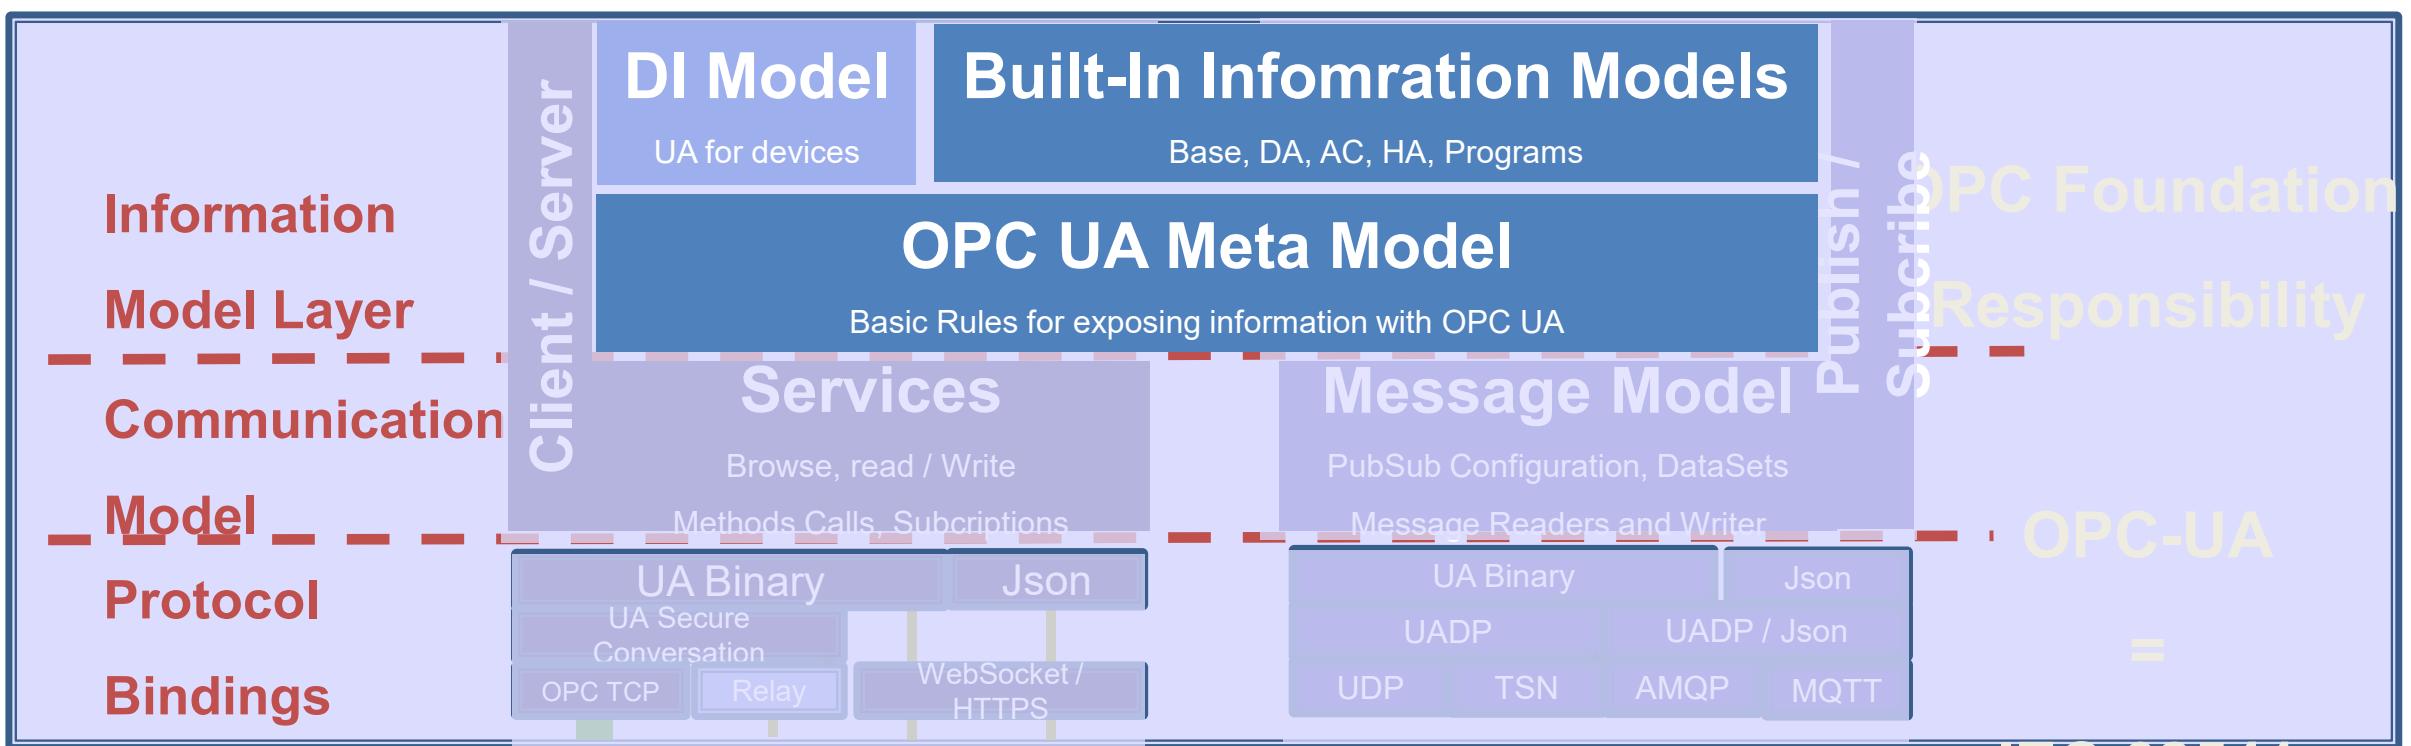

- ▶ **Client / Server** - service oriented, request / response, on demand
- ▶ **Publish / Subscribe** – message oriented - multicast, unidirectional, „cyclic“

# Data Models

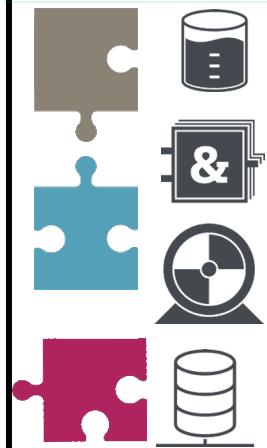

OPC UA intègre une couche haute supplémentaire , la modélisation des données

- ▶ Orienté objet
- ▶ Flexible
- ▶ évolutif

# Modélisation des échanges en utilisant des éléments de base OPC-UA

## PLC Data

ProductionEquipment_1

# Process de certification

- Tests sur les fonctionnalités
- Produits testés avec 5 autres
- Tests de communications
- Combine la conformité, l'intégrité

## Bénéfice de la certification

- Produits ( Hard et/ou Soft) vérifiée d'OPC-UA
- Démontrer l'expérience dans OPC-UA
- Montrer l'engagement pour la technologie
- Fiabilité vérifiée
- Moins d'efforts de support
- Listé sur le site des produits certifiés de l'OPC Foundation

# Working Groups

- 71 different working groups
  - Joint -> 58
  - Internal -> 17
  - External -> 1

The screenshot shows a web browser displaying the 'List of Working Groups' page from the OPC Foundation website at [opcfoundation.org/about/working-groups/](http://opcfoundation.org/about/working-groups/). The page features a blue header with navigation links for About, Membership, Products, Certification, Markets & Collaboration, Resources, and News & Events. Below the header, the title 'List of Working Groups' is displayed, along with a breadcrumb trail: Home > Working Groups. The main content area includes a search bar, filter options for Working Group Type (Internal, Joint, External), Status (Proposed, Active, Completed, Inactive), and Classification (Core UA Topics, Generic Models, Factory Automation). A table lists various working groups with their descriptions, partner logos, partner organizations, and chairs. The table columns are labeled: NAME, ABSTRACT, PARTNER LOGO, PARTNER ORG, and CHAIR.

NAME	ABSTRACT	PARTNER LOGO	PARTNER ORG	CHAIR
Additive Manufacturing	The working group develops OPC UA Information Models for the industrial process chain of additive manufacturing ("AM") so that AM systems and other systems directly involved in the additive manufacturing process can be easily connected, configure...		VDMA	Martin Gehringer
Analyzer Devices - ADI	Develop specifications for analyzers irrespective of the underlying device protocols. Analyzer devices are comprised of one or more analyzer channels with a single address space which has its own configuration, status and control. Examples: Particle ...			Claude Lafond
Asset Management Basics	Defines common asset management models that can be used directly or as base for other companion specifications to refine those concepts for their domain specific needs.			Wolfgang Mahnke
Automatic Identification Devices - AutoID	Develop specifications for identification devices executing a scan, read or write process. Comprises barcode, OCR, 2D code, RFID, NFC, RTLS, sensors and mobile computing.		AIM – Association for Automatic Data Capture, Identification and Mobility	Bernd Wieseler
AutomationML model	Develop an OPC UA specification for AutomationML and an XML schema to describe OPC UA Servers and their communication parameters in an AutomationML file and to integrate UANodeSet address space XML files into AutomationML.	<a href="#">AutomationML</a>	AutomationML e.V.	Miriam Schleipen
BACnet	Specify a gateway interface between the BACNET object model and OPC UA -> integration of building and industry automation.		BACnet Interest Group Europe e.v. (BIG-EU)	Frank Schubert
Carbon Capture and	The OPC UA CCS Working Group will develop several OPC UA Information Models for		VDMA, CESMII, OPC	Erich Barnstedt

[www.opcfoundation.org](http://www.opcfoundation.org) -> About -> Working Groups -> List of Working Groups

# UA Cloud Library

- A *queryable* online store of OPC UA CS information models.
- 126 OPC UA Information Models for the companion specifications available
- UA Cloud Library Explorer
- GraphQL Editor

The screenshot shows a web browser window titled "Explorer - UA Cloud Library" with the URL "uacloudlibrary.opcfoundation.org/Explorer". The page features the OPC Foundation logo and navigation links for "Hello" and "Logout". Below the header, there is a grid of six cards, each representing an OPC UA Information Model:

- Analyzer Devices (ADI)** by OPC Foundation: This specification defines an object model that describes analysers separated into a... License: Custom Version: 1.01 Downloads: 54

# Technology News

- Updates about the latest versions of CS
  - Subscription to the technology updates
- Call for review
  - Review the companion specifications before their release.
- Call for participation
  - Join the working groups

The screenshot shows a web browser window displaying the OPC Foundation's Technology News page. The page features the OPC Foundation logo and navigation menu. The main content area is titled "OPC Technology News" and includes a sub-section for "Publications". A table lists several documents with their release dates:

DOCUMENT	DATE
OPC 40001-1 Machinery Basic Building Blocks - V 1.03.0	2023-06-08
OPC 30030 BACnet - V 2.00.1	2023-06-02
OPC 40210 Geometric Measuring Systems - V 1.00	2023-05-24
OPC 40200 Weighing Technology - V 1.01.0	2023-04-19
OPC 30143 PROFI-Encoder - V 1.00	2023-04-15
OPC 30020 MDIS OPC UA Companion Specification - V 1.2.1	2023-04-03

# Spread of OPC UA Companion Specifications

## Manufacturing mechanics

40001 - Machinery  
40010 - Robotics - Vertical Integration  
40020 - Cranes&Hoists - MotionDevicesSystemBase  
40077 - PlasticsRubber – IM Machines to MES  
40079 - PlasticsRubber – IM Machines to Robot  
40082 - PlasticsRubber - Peripheral Devices  
40083 - PlasticsRubber - General Types  
40084 - PlasticsRubber - Extrusion  
40086 - PlasticsRubber - Material Supply Systems  
40100 - Machine Vision  
40200 - Weighing Technology  
40223 - Pumps and VacuumPumps  
40250 - Compressed Air Systems  
40301 - Flat Glass Processing  
40400 - UA for Powertrain  
40444 - Textile Testing Devices  
40451 - Tightening Systems  
40501 - Machine Tools  
40502 - CNC Systems  
40540 - UA for Additive Manufacturing  
40550 - Woodworking Machinery  
40740 - Process Air Extraction and Filtration

## Field Device Integration

30080 - FDI Specification  
30090 - Field Device Tool

## Field Communication

30100 - Sercos Devices  
30110 - Powerlink  
30120 - IO-Link Devices and IO-Link Masters  
30130 - CSP+ForMachine . CCLink  
30140 - PROFINET  
30141 - PROFInergy  
30142 - PROFI-RemoteIO  
30143 - PROFI-Encoder

## Industrial Automation

30400 - Cloud Library  
10020 - Analyzer Devices  
30000 - PLC Model based on IEC 61131-3  
30001 - PLC Client Function Blocks  
30010 - AutOID Devices  
30020 - MDIS OPC UA Companion Specification  
30081 - Process Automation Devices - PADIM  
10000-100 - Devices  
10000-110 - Asset Management Basics  
10000-120 - XML DataType Mapping  
10000-200 - Industrial Automation - Basics  
10000-210 - IA- Relative Spatial Location

## Consumer Industries

30060 - Tobacco Machinery  
30200 - Commercial Kitchen Equipment

## Enterprise, Asset Management, Packaging

10030 - ISA-95 Common Object Model  
10031 - ISA-95-4 Job Control  
30050 - PackML - Packaging Control  
30260 - Open-SCS Product Serialization  
30261 - Open-SCS Job Orders  
40600 - Weihenstephan Standards

## Engineering Data

30040 - AutomationML  
30250 - DEXPI P&ID

## Energy Automation

10040 - IEC 61850 - Electrical Substation Automation

## Building Automation

30030 - BACnet

## Oil and Gas, Mining

40561 - Mining - Extraction  
40562 - Mining - LoadingEquipment  
40563 - Mining - TransportAndDumping  
40564 - Mining - MineralProcessing  
40565 - Mining - DevSupport  
40566 - Mining - MonitoringAndSupervision  
40567 - Mining - PELO Services  
40569 - Mining - ACandUC

# JWGs with VDMA
